SKILLS

- ❖ Java, C++, Python
- ❖ HTML, CSS, JavaScript, Bootstrap, Tailwind CSS
- ❖ Node.js, Express.js, React.js, Redux, RESTful APIs
- ❖ SQL, MongoDB, Firebase, Git & GitHub, Authentication and Authorization, Docker, CICD

EDUCATION

- ❖ B-Tech in **CSE AI** | Vishwakarma Institute of Technology, Pune. **CGPA: 8.83** | (2024-27)
- ❖ Diploma in **Computer Engineering** | Sou.Venutai Chavan Polytechnic, Pune. **89.94%** | (2022-24)

EXPERIENCE

- ❖ **Intern | CodeNucleus** : Learnt Python along with data Science. (June 23 to July 23)

ACADEMIC PROJECTS

- ❖ **CodeVault : Beginner-Friendly Version Control System**
<https://code-vault-plum.vercel.app/>
Developed a full-stack, Git-like **version control system** with a web dashboard and **CLI** for simplified code management. Features include repository creation, file tracking, commit history, issue management, and secure cloud storage (**AWS S3, MongoDB Atlas**), built using **React.js, Node.js/Express.js, and MongoDB**.
- ❖ **JanSahyog : Smart Civic Issue Management Platform**
<https://github.com/amaanslyf/JanSahyog>
Built a full-stack civic governance system with a **React** admin portal, **React Native (Expo SDK 51)** mobile app, **Firebase (Auth, Firestore, Storage, Cloud Functions)**, and **Material UI** to enable citizens to report **geo-tagged issues** with photos and track resolution in **real time**. The platform provides officials with **analytics dashboards, interactive maps, automated issue routing**, and **push notifications** to streamline municipal workflows and improve transparency in local governance. .
- ❖ **HuddleUp : Real-Time MERN Video Conferencing Application**
<https://huddle-up-lilac.vercel.app/>
Developed a full-stack **video conferencing** platform using **React, Node.js, and MongoDB**, enabling real-time peer-to-peer video and chat with **WebRTC, PeerJS, and Socket.IO**. Implemented secure **JWT authentication** and deployed the decoupled application to Vercel and Render.
- ❖ **AISLE : Artificial Intelligence System for Learning & Expression**
<https://aisle-chi.vercel.app/>
Engineered a full-stack MERN AI chat application, deploying a stateless Node.js/Express **RESTful API** on Render and a responsive **React/Vite** frontend on Vercel. The system uses the **OpenAI API** for real-time conversational AI, with a custom **MongoDB** schema for persistent, multi-threaded chat history.
- ❖ **YourKabaadiwaala | Online Scrap Dealer Platform (WIX website builder)**
The "Scrap Dealer" web application is a cutting-edge solution designed to revolutionize the scrap dealing industry by streamlining and modernizing operations for scrap dealers, recyclers, and their customers.

PUBLISHED RESEARCH PAPERS / PATENTS

- ❖ International Journal of Advanced Research in Science, Communication and Technology (IJARSCT) *Scrap Dealer Web Application*.
- ❖ International Journal of Innovative Research in Science, Engineering and Technology (IJIRCET) *AI-Eye on Campus: Detecting Smoking through CCTV-Enabled Machine Learning*.
- ❖ Patent Published for **REAL-TIME CROWD INSIGHTS & PREDICTION OF CROWD** (Application No.:202521029894)
- ❖ Patent Published for **Drone Detection and Alerting System** (Application No.:202521098333)

ACHIEVEMENTS

- Actively participated in various technical competitions, including the **FUSION 2025 (Top 25 Finalists)** intercollegiate **TECH TITANS 2024** project competition, the national-level **TECHNOTHON 2024** startup competition, and the **PRABAL national-level hackathon** recognized by **Google Developer Groups (GDG)**.
